

New School Assignments

There is an alert now message going out to everyone today letting them know we are extending the registration until March 18th. Also we are planning a community meeting on March 7 at the middle school to discuss registration and a fall back plan should the general contractor fall short of his timeline. There is a bill in Raleigh that may allow school districts to start earlier than August 25th which we would welcome but it will cause a nightmare for the new school openings.
